## SUMMARY

Flutter developer with 2.8 years of experience building scalable, secure, and high-performance cross-platform mobile apps. Skilled in **clean architecture**, **REST API integration**, **third-party services**, and **full deployment pipelines**. Strong focus on app security, performance optimization, and delivering production-ready solutions across **Android**, **iOS**, and **Web**.

## EXPERIENCE

### Uncia, Chennai — Flutter Developer

July 2024 - August 2025

- **Developed End-to-End Loan Lending Application:** Built a robust and scalable cross-platform mobile application from scratch for ICICI Home Finance Company using Flutter tailored for the digital home loan journey.
- **Multi-Platform Deployment:** Handled full deployment of the app on iOS, Android and web, ensuring platform compliance, performance optimization, and a consistent user experience across devices resulting in 5K+ total downloads and consistent 4+ star user ratings across platforms.
- **API Integration :** Integrated secure and encrypted RESTful APIs for real-time loan data access, authentication, and backend communication.
- **Third-Party Services Integration:** Integrated multiple external APIs including Karza, Value momentum, Perfios, and others for KYC, financial verification, and data enrichment.
- **Authentication and Security:** Implemented OTP-based login and handled local authentication, session timeout & logout, SSL pinning, and end-to-end encryption/decryption to ensure maximum app security.
- **Project Execution & Collaboration:** Contributed from project planning through deployment, collaborating with product managers, backend developers, and QA teams to deliver quality releases.
- **Analytics & Monitoring:** Used **Firebase** and **Crashlytics** for crash reporting, analytics, and performance tracking in production.

### Regami Solutions, Chennai — Flutter Developer

February 2023 - July 2024

- **Developed Cross-Platform Applications:** Created and maintained robust mobile applications using Flutter for both iOS and Android.
- **iOS and Android Deployment:** Managed the end-to-end deployment process for multiple applications on both the App Store and Google Play Store, ensuring compliance with all platform guidelines and optimizing for best performance.
- **Project Management:** Single-handedly handled the development and deployment of multiple projects simultaneously, demonstrating excellent time management and multitasking skills.

## SKILLS

Languages :

Dart

Java

Kotlin

C

Frameworks:

Android Native

Flutter

## INTERESTS

Coding

Travelling

Cooking

Music - Guitar

Skating

## LANGUAGES

English

Tamil

Hindi

- **Framework Upgradation:** Successfully upgraded Flutter frameworks from no null safety to enable null safety, enhancing code reliability and reducing potential runtime errors.
- **Embedded IP Camera Live Streaming:** Gained valuable experience working with embedded IP camera live streaming within Android applications, enhancing the functionality and user experience of projects.

## EDUCATION

### College of Applied Sciences, — BCA

June 2016 - March 2019

#### Project: E-Baby Cradle

Developed an IoT-based Android application using Android Native to control a baby cradle. Implemented features for remote cradle control and real-time notifications to alert parents. Collaborated with hardware engineers for seamless integration and ensured application reliability through extensive testing.

## PROJECTS

### VelocT Onboarding — *Sales Enablement App for ICICI Home Finance*

**Role:** Mobile App Developer

**Platform:** Android and iOS (Flutter)

Play Store Link: [velocT Onboarding](#)

App Store Link: [velocT Onboarding](#)

Developed and deployed a mobile application designed to streamline the customer acquisition and loan onboarding process for the **ICICI Home Finance Company Ltd.** The app empowers the sales team to digitally source and onboard customers interested in **Home Loans (HL)** and **Loans Against Property (LAP)**. Utilized BLoC for scalable state management across modules to ensure maintainable and testable architecture.

### Ntelcare family — *IoT-Based Home Monitoring Solution*

**Role:** Mobile App Developer

**Platform:** Android and iOS (Flutter)

Play Store Link: [Ntelcare Family](#)

App Store Link: [Ntelcare Family](#)

Developed a smart home monitoring application designed for non-intrusive elderly and home care. The **NtelCare** app integrates with IoT-based sensors deployed across residential spaces to track critical environmental and health parameters.
